# SASHLOCK REBATE KITS

*Atlantic Accessories*

A Rebate Kit is an ironmongery accessory that is used to allow a lock or latch mechanism to be fitted correctly on a pair of double opening rebated doors. The term 'rebated doors' is used to describe a set of two doors that have been cut, or rebated, into one another. Use with our matching finish surface bolt or rack bolt fitted at the top of the door to keep one side of the double doors acting as a keep.
