

NEW DIN LOCKS

Available in up to **9 finishes**, our DIN lock range comes with options for either a **square** or **radius** edge. We offer a range of lock types, including **latch**, **bathroom lock**, **sashlock**, and **deadlock**.

Fire-rated to FD20/30/60/90/120 standards, these locks are compatible with intumescent seals, providing additional fire safety where required. They are specifically designed for **high-traffic areas**, such as public buildings and schools, where durability is essential.

With **high-quality, heavy-duty construction**, the latch has been rigorously tested to 200,000 cycles, and the deadbolt has been tested to 50,000 cycles, ensuring long-lasting performance.

The **standard size** of the lock case allows for doors to be pre-cut to a single size, making installation efficient and allowing any lock type to fit seamlessly into the cut-out.
